1 Introduction

A description of the website by using the MUDPY method:

Concept

Overview of the product Moto G6 Plus from the Motorola brand. This site is intended primarily for people who are interested in this smartphone but can also be a source of information for other purposes. This domain contains basic information about the product and the user can easily move between the information via the menu bar. There is an opportunity to switch between two languages, English and Slovak. If the user has any questions or wants to know more, he can contact us.

Goals

The goal is to bring information about the smartphone closer to the average user. For a better survey, this information is divided into several sections. The user can choose what interests him the most. In addition to the specifications, the site also contains various pictures and videos about the telephone. Thanks to this, the customer can have a better idea of the product visualization. We try to look at the phone from an objective point of view, so we also offer a few reviews from direct users of Moto G6 Plus.

Requirements

Target Audience

This project is aimed mainly at young and middle-aged users. As this is a middle-class mobile phone, this site is not intended for demanding smartphone users. So we focus on average users who want to have the best possible smartphone for the best / reasonable price for everyday use. Moto G6 Plus is a type of model that is controlling by gestures. Therefore, this domain is mainly focusing on gesture enthusiasts, where they do not have to use unnecessary steps in the mobile and with gestures, they get to applications faster.

Treatment

The appearance of the page is simple for easier orientation between the information. Specifications are giving in the tables for better clarity.

The applications are a separate subpage, which also includes cameras. In this section, we offer photos captured by the camera and videos. If the user is interested in purchasing this product, we offer an overview of prices from various sites.

Specifications

Using HTML and CSS markup to customize the look.

The most distinctive is the menu bar, for better orientation. The text is highlighted in bold, and the font is easy to read.

The individual sections are modified so that the user understands them as best as possible. There are tables, pictures and highlighted texts. The headings have bigger sizes to attract attention.

Production

Photos taken from my phone in jpg and jpeg format, videos captured from my phone's video camera in mp4 format (video edited in Adobe Premiere Pro).

Specifications about the phone drawn from the website cena-vykon.sk, functions, gestures, applications about the phone are drawn from the official website motorola-support.com and user guide from Motorola and in terms of my use of the phone.

Reviews are written by customers.

Logo and photo editing created in Adobe Photoshop CC.

Frameworks were created using the wireframepro.mockflow.com website.

Navigation map created using the hexcalidraw.com website.

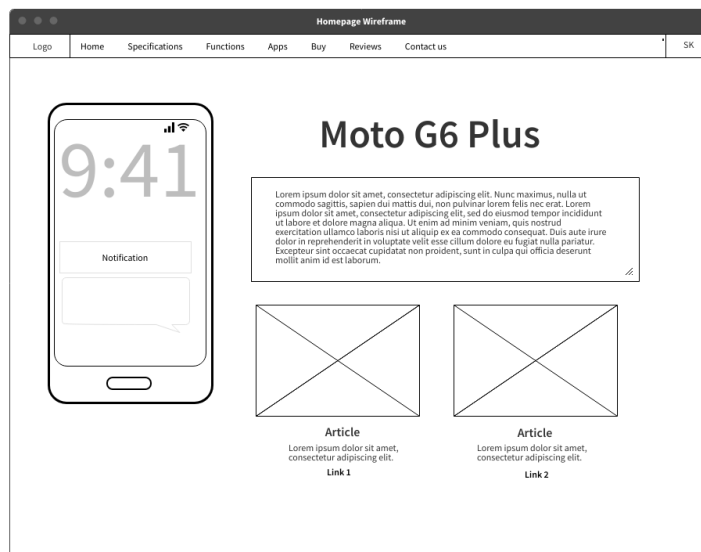

Encoding in Sublime Text.

2 Images with wireframe design

General information: In the upper left corner is located the logo of the website. The menu bar consists of 7 elements: Home, Specifications, Functions, Apps, Buy, Reviews and Contact us. In the upper right corner, you can switch language to Slovak for the whole site.

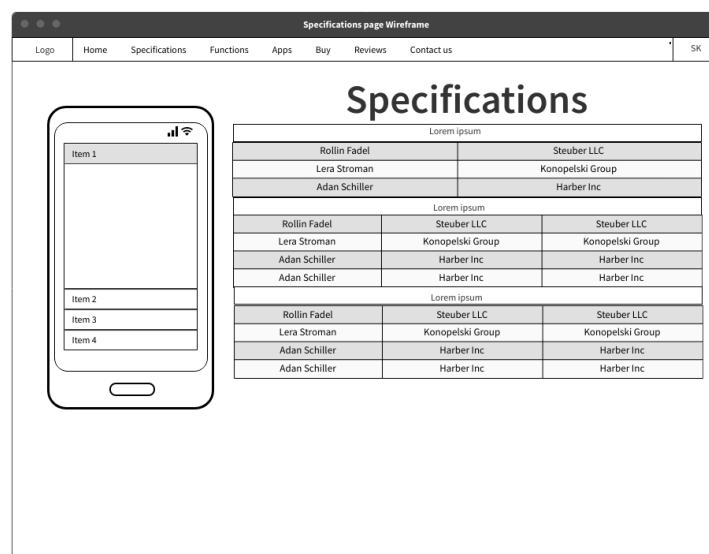

2.1 Main page – Home

This page is an introduction to the product. How smartphone looks and which qualities have. There will be some information about a mobile brand too. Below this text are two links to the other subpages of this website.

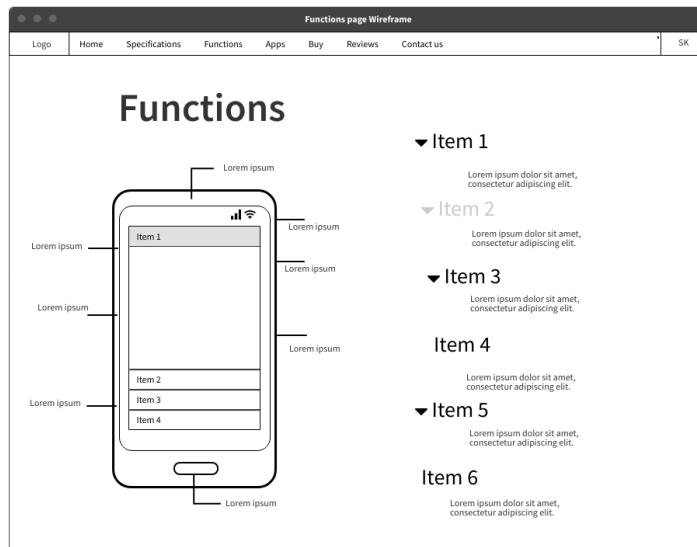

2.2 Subpage – Specifications

There are some mobile parameters and specifications.

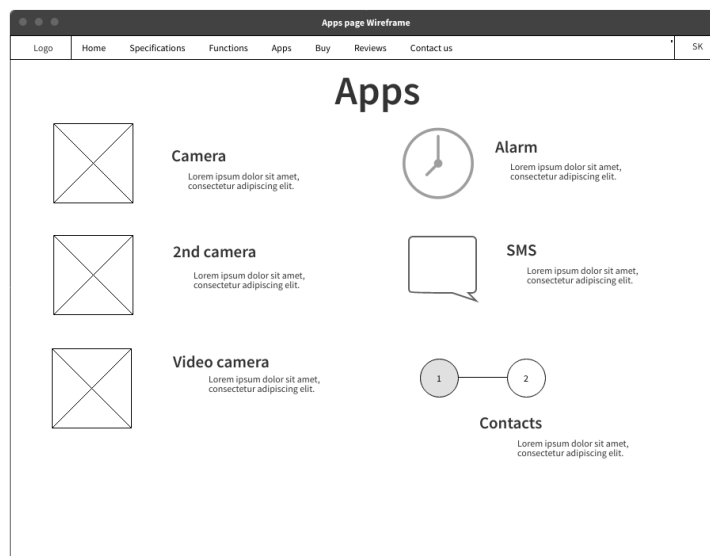

2.3 Subpage – Functions

Information about the phone features.

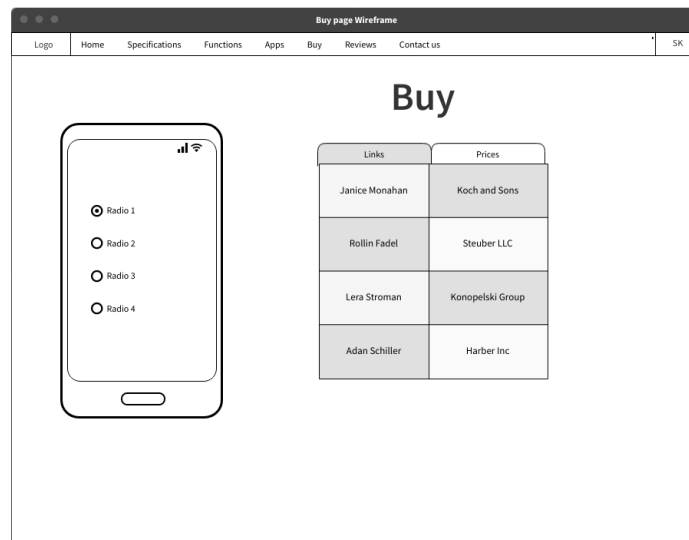

2.4 Subpage – Apps

Specification of basic phone applications.

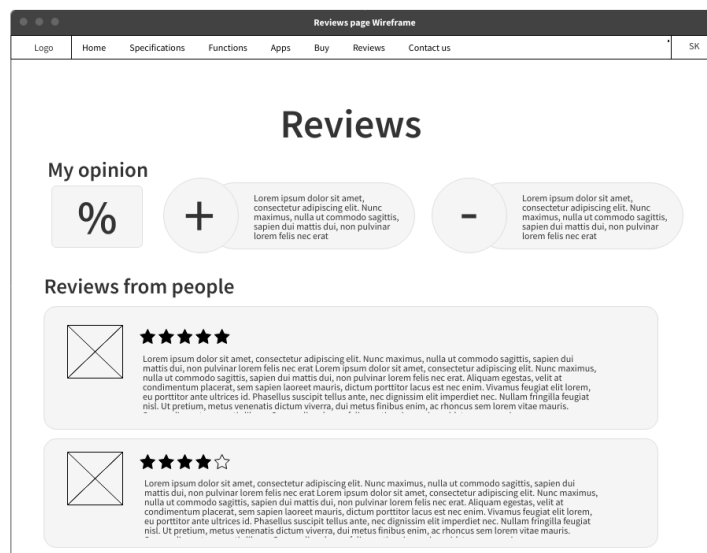

2.5 Subpage – Buy

The introduction of online stores with the best prices and credibility. We will mention Slovak and foreign ones.

2.6 Subpage – Reviews

Evaluation of the phone from my point of view. What are the advantages and disadvantages of using it. Below these sections are other people's ratings and opinions of this product.

2.7 Subpage – Contact us

Contact us page Wireframe

3 Navigation map

The main page is Home. From the Home page, we can get to every subpage separately. We have six subpages: Specifications, Functions, Apps, Buy, Reviews and Contact us. From these subpages, it is possible to go back to the main page by clicking on the bar menu with the title Home. The same case is with the subpages. We cannot go through one subpage to the other without a bar menu. The only exception has two subpages: Specifications and Functions. The subpage Buy contains external links to other external sites.

4 Texts for the website

This chapter contains texts from our website. They are written in English and Slovak. The navigation bar consists of seven pages: Home, Specifications, Functions, Apps, Buy, Reviews, Contact us. In the Slovak language, it is Domov, Parametre, Funkcie, Aplikácie, Kúpa, Recenzie a Kontakt. The footer contains the copyright notice, the author's name and the year the page was founded.

4.1 Main page – Home

Basic info - EN: This smartphone is part of the sixth generation of the Moto G family. The product is unique mainly due to its originality and eye-catching appearance. The architecture of the phone adapts to better-holding hands because of the curved glass at the sides. A backside gives the impression of 3D glass.

Below the screen is located a fingerprint reader which offers many functions besides that. The display has a good balance between the colours and contrast.

But most of all, it boasts a dual camera. One is the main and has 12MP and the second one specifies depth detection with 5MP. If you are interested in this product, you can read more about it on this page.

Základné info - SK: Tento smartphone je súčasťou šiestej generácie rodiny Moto G. Výrobok je jedinečný predovšetkým svojou originalitou a pútavým vzhľadom. Architektúra telefónu sa prispôsobuje lepšiemu držaniu v rukách vďaka zaoblenému sklu po stranách. Zadná strana budí dojem 3D skla.

Pod displejom sa nachádza čítačka odtlačkov prstov, ktorá okrem toho ponúka mnoho ďalších funkcií. Displej má dobrú rovnováhu medzi farbami a kontrastom.

Predovšetkým sa však môže pochváliť duálnym fotoaparátom. Jeden je hlavný a má 12 MP a druhý špecifikuje detekciu hĺbky s 5 MP. Ak vás tento produkt zaujal, môžete si o ňom prečítať viac na tejto stránke.

EN: Google voice

Use voice to make a call

Tap on the microphone on the Home screen or say "OK Google" to control your phone by voice. Then say the name of who you want to make a call or send SMS by saying "call" or "send a text".

Search by voice

Tap on the microphone on the Home screen or say "OK Google" to control your phone by voice.

Picture-in-Picture

You can do multiple tasks. For example, if you're watching a video or calling with someone, you can also do something else, and the video is playing in the small window.

Control with one touch

Lock and unlock your phone, navigate your phone and more just with one touch by using the fingerprint sensor.

Home: tap quickly on the fingerprint sensor to go to your Home screen

Back: swipe right to left on the sensor to go back to the previous screen

Recents: swipe left to right on the sensor to view recent apps

Lock: press the sensor until you feel a short vibration and then release to lock the screen

Google Assistant: touch and hold the sensor until you feel a longer vibration to activate it

Moto

Special features

Moto Key: securely log into your apps and websites with your fingerprint

Moto Actions: use gestures as phone shortcuts

Moto Display: see your notifications as a glance and night settings

Moto Voice: speak to your phone

Screen lock

You can choose from many options.

Swipe: touch the screen and drag up to unlock

Pattern: draw a pattern to unlock

PIN: enter four to sixteen digits to unlock

Password: enter four to sixteen letters, digits or symbols to unlock

Fingerprint: use fingerprint sensor to unlock

Face: look at the screen to unlock

SK: Hlas Google

Na uskutočnenie hovoru použite hlas, rozprávajte.

Kliknite na mikrofón, ktorý je na ploche alebo povedzte „OK Google“

Telefónu vašim hlasom. Potom povedzte meno komu chcete telefonovať alebo odoslať SMS a vyslovte „zavolaj“ alebo „pošli textovú správu“.

Hľadajte podľa hlasu

Ovládanie spustíte klepnutím na mikrofón na ploche alebo vyslovením príkazu „OK Google“ vašim hlasom.

Obraz v obraze

Môžete vykonávať viacero úloh. Ak napríklad sledujete video alebo s niekým telefonujete, môžete popritom robiť aj niečo iné a video sa prehráva v malom okne na pozadí.

Ovládanie jedným dotykom

Zamknite a odomknite telefón, navigujte a ďalšie funkcie jediným dotykom pomocou snímača odtlačkov prstov.

Domov: klepnutím na snímač odtlačkov prstov sa dostanete na domovskú obrazovku

Späť: prejdením prstom po senzore sprava doľava sa vrátite na predchádzajúcu obrazovku

Nedávne: nedávne aplikácie zobrazíte prejdením prstom po senzore zľava doprava

Zamknutie: stlačte senzor, kým nepocítite krátke vibrácie, a potom zamkne obrazovku

Asistent Google: pridržte senzor, kým nepocítite dlhšie vibrácie pre Aktiváciu

Moto

Špeciálne vlastnosti

Moto Key: bezpečne sa prihláste do svojich aplikácií a webových stránok pomocou odtlačku prsta

Moto akcie: používajte gestá ako skratky k telefónu

Moto displej: pozrite sa na svoje oznámenia a na nočné nastavenia

Moto Voice: hovorte s telefónom

Zámok obrazovky

Môžete si vybrať z mnohých možností.

Potiahnutie prstom: dotknite sa obrazovky a potiahnutím nahor odomknete

Vzor: odomknutím nakreslite vzor

PIN: odomknete zadaním štyroch až šestnástich číslíc

Heslo: na odomknutie zadajte štyri až šestnásť písmen, číslíc alebo symbolov

Odtlačok prsta: na odomknutie použite snímač odtlačkov prstov

Tvár: pozrite sa na obrazovku a odomkne sa

4.4 Subpage - Apps

EN: Camera – rear and front camera testing

Video camera – testing a video camera

Google Play – Android apps and games, which you can download

Chrome – browser app

Gmail – send and receive email from your personal account

Google Maps – GPS navigation with voice

Google Drive – save all photos, videos, documents and more content to an online folder, share and sync

YouTube – watch videos and podcasts

SK: Fotoaparát - testovanie zadného a predného fotoaparátu

Videokamera - testovanie videokamery

Google Play - aplikácie a hry pre Android, ktoré si môžete stiahnuť

Chrome - aplikácia prehliadača

Gmail - odosielanie a prijímanie e-mailov z vášho osobného účtu

Google Maps - GPS navigácia s hlasom

Disk Google - ukladanie všetkých fotografií, videí, dokumentov a ďalších obsahov do online priečinka, zdieľajte ho a synchronizujte

YouTube - sledujte videá a podcasty

4.6 Subpage – Reviews

EN: Rating: 85%

Advantages:

- Battery capacity
- Camera
- Gestures
- Fast
- Dual SIM
- Design
- Gorilla Glass 3

Disadvantages:

- Big size of the phone
- Glass background
- No wireless charging support
- Stereo speaker – low quality

Reviews:

- (source my brother): Motorola Moto G6 Plus is very reliable. I liked the clean Android system from Google, which goes fast without chopping and without unnecessary superstructures with regular system updates as well as very addictive gestures on Motorola devices. Overall, this brand offers a good price-performance ratio + extra stuff, in other words "a lot of music for little money". I do not regret its purchase, it is very practical and for the price for which it sells me quite a lot of things in addition, which many smartphones you will not find much in the competition, such as Moto Gestures for me complete satisfaction.
- (source alza):
 - Almost pure Android
 - Frequent updates
 - Perfect audio output to the jack
 - Beautiful and especially extremely bright display, can be read comfortably even in direct sunlight

- Design
- The fingerprint reader works like a new multifunctional Android button
- The hydrophobic surface works
- Loudspeaker
- Fast charging is fast
- The camera protrudes a lot from the body, and some packaging does not protect it
- Gestures do not work with sensors covered on the front (closed cover)
- The included silicone case also does not protect the edge around the camera
- (source: zive.sk)
Moto G6 Plus is a very good smartphone in the middle class. It has no major weaknesses and nothing important is missing. In the price class below 300 euros, it is necessary to prepare for several compromises, but the important thing is that the system runs fast, has a large display and takes good photos.
- + Fast fingerprint sensor under the display
- + Well-tuned Android system
- + Without ballast and uselessness
- + Decent camera
- The body could have been smaller
- Pretty speaker sound
- Weak display of black
- Common camera focus

SK: Hodnotenie: 85%

Výhody:

- Kapacita batérie
- Fotoaparát
- Gestá
- Rýchly
- Dual SIM
- Dizajn
- Gorilla Glass 3

Nevýhody:

- Väčšia veľkosť telefónu
- Sklenené pozadie
- Nemá bezdrôtové nabíjanie
- Slabý reproduktor
-

Reviews:

- (zdroj môj brat – písal ju aj na alzu): Motorola Moto G6 Plus je veľmi spoľahlivá. Páčil sa mi čistý systém Android od Google, ktorý ide rýchlo bez sekania a bez zbytočných nadstavieb s pravidelnými aktualizáciami systému a tiež veľmi návykovými gestami na zariadeniach Motorola. Celkovo táto značka ponúka dobrý pomer ceny a výkonu + veci navyše, inými slovami „veľa muziky za málo peňazí“. Neľutujem jeho kúpu, je veľmi praktický a za tu cenu za ktorú sa predáva ma dosť veľa veci navyše ktoré mnohé smartfóny u konkurencie moc nenájdete, ako sú Moto Gestá, za mňa úplná spokojnosť.
- (zdroj alza):
 - Takmer čistý Android
 - Časté aktualizácie
 - Perfektné audio výstup na jack
 - Krásny a hlavne extrémne jasný displej, dá sa pohodlne čítať aj na priamom slnku
 - Dizajn
 - Čítačka odtlačkov funguje ako nové multifunkčné Android tlačidlo
 - Hydrofóbny povrch funguje
 - Hlasný reproduktor
 - Rýchle nabíjanie
 - Fotoaparát veľmi vytŕča z tela, ani niektoré obaly ho neochránia
 - Gestá nefungujú pri zakrytých snímačoch na prednej strane (zavretý cover)
 - Pribalený silikónový obal tiež nechráni hranu okolo fotoaparátu
- (source: zive.sk)

Moto G6 Plus je v rámci pomerov strednej triedy veľmi dobrý smartfón. Nemá žiadne zásadné slabé miesto a ani nič dôležité nechýba. V cenovej triede pod 300 eur sa treba pripraviť na niekoľko kompromisov, podstatné ale je, že systém beží svižne, má veľký displej a slušne fotí.

 - +Rýchly snímač odtlačkov pod displejom
 - +Výborne vyladený systém Android
 - +Bez balastu a zbytočností
 - +Slušný foťák
 - Telo mohlo byť aj menšie
 - Mizerný zvuk reproduktora
 - Slabé zobrazenie čiernej farby displeja
 - Zmätočné ostrenie fotoaparátu
